1. INTRODUCTION

UpDeep standard reference materials (SRM) are intended to be used in weak leach (i.e. geochemical) analysis for providing an affordable method of controlling the quality of soil samples for mineral exploration purposes. SRMs are produced less rigorously compared to e.g. certified reference materials. The UpDeep SRM samples do not follow the ISO standardization and are therefore not certified reference materials (CRM). However, the UpDeep standard reference materials are more affordable and can thus be inserted in the analysis sequence more frequently than CRMs. For the user of the UpDeep SRMs, the purpose is to quantify laboratory accuracy externally in the form of bias.

2. SOURCE MATERIALS

UpDeep_ORG_Ah1 is mineral soil material collected from B-horizon on the Au-REE bearing quartz-hematite vein in the Mäkärä exploration target, northern Finland, in 2017.

UpDeep_ORG_Ah1 is one of six reference materials (Ah- and B-horizon, common juniper foliage, Scots pine bark, Norway spruce bark and foliage) collected from the Mäkärä exploration target in the UpDeep project.

3. COMMINUTION AND HOMOGENISATION PROCEDURES

The UpDeep_ORG_Ah1 SRM was prepared as follows:

- homogenization of the bulk Ah horizon sample in the field
- dividing and packaging in 120 g units ziplog plastic bags
- drying at 40°C for two days and in the laboratory 2, drying at 60°C
- sieving in the laboratory 1: - 180 µm and in the laboratory 2: -80 mesh (-177 µm)

4. ANALYTICAL PROGRAM

UpDeep_ORG_Ah1 SRM samples were analyzed in two geochemical laboratories

- ALS Minerals/ALS Global (Vancouver, Canada through, ALS, Sodankylä, Finland, laboratory 1)
- Bureau Veritas Minerals Acmelabs (BVAcmelabs, Shaughnessy St., Vancouver, BC, Canada, laboratory 2)

The methods used were:

- super trace modified weak aqua regia by ICP-MS with REE add-on (method code ME-MS41WREE, ALS Minerals/ALS Global)
- 1:1:1 aqua regia digestion Ultratrace by ICP-MS (method code AQ250-EXT+REE, Bureau Veritas Minerals Acmelabs), sample size 0.5 g
- partial leach with 0.1 M sodium pyrophosphate by ICP-MS (method code LH103, Bureau Veritas Minerals Acmelabs), sample size 1 g
- LOI by loss of ignition (Bureau Veritas Minerals Acmelabs)

Ten UpDeep_ORG_Ah1 SRM aliquots were sent to the both of the laboratories. Tables 1-3 (Chapter 6) present information values for the laboratory results. The RSD% values < 5 are marked as green, the $5 \leq \text{RSD}\% \leq 15$ are marked with orange and the $\text{RSD}\% > 15$ are marked with red. Elements having less than four observations between the detection limits are coloured gray.

5. STATISTICAL ANALYSIS

Analysed elements, units, lower (LDL) and upper detection limits (UDL), percentage of <LDL, >UDL and discretized values, mean, median, standard deviation (SD), relative standard deviation (RSD%) and median absolute deviation (MAD) are presented in Chapter 6.

Original data, quality control monitoring and statistical measures are available upon request.

6. PARTICIPANT LABORATORIES

ALS, Vancouver, Canada

Table 1. Statistics for UpDeep_ORG_Ah1 analysed with super trace modified weak aqua regia method by ICP-MS with REE add-on (method code ME-MS41W-REE), based on ten aliquots. LDL = lower detection limit, pct_LDL = percent of samples under lower detection limit, UDL = upper detection limit, pct_UDL = percent of samples over upper detection limit, pct_discr = percent of discretized values, SD = standard deviation, RSD% = relative standard deviation percent and MAD= median absolute deviation. The RSD% values < 5 are marked as green, the 5 ≤ RSD% ≤ 15 are marked with orange and the RSD% > 15 are marked with red. Elements having less than four observations between the detection limits are coloured gray.

7. PREPARER ANS SUPPLIER

UpDeep_ORG_Ah1 SRMs are prepared by the Geological Survey of Finland (GTK) in a project Upscaling deep buried geochemical exploration techniques into European business (UpDeep) and supplied by GTK and Scandinavian Geopool.

Contact information:

Ab Scandinavian GeoPool Ltd, Merilokinkaari 15a, 67200 KOKKOLA, Finland,
jens.rönnqvist(at)geopool.fi, tel. +358 50 337 7116.

Geological Survey of Finland, Mintec, Tutkijankatu 1, 83500 OUTOKUMPU, Finland,
antti.taskinen(at)gtk.fi, tero.korhonen(at)gtk.fi, anne.taivalkoski(at)gtk.fi (+358 29 5034264),
pertti.sarala(at)gtk.fi

This activity has received funding from the European Institute of Innovation and Technology (EIT), a body of the European Union, under the Horizon 2020, the EU Framework Programme for Research and Innovation.

8. INTENDED USE

UpDeep_ORG_Ah1 SRMs are intended to quantify laboratory accuracy and to monitor laboratory precision, drift, periodic concentration shifts, unusual breaks and outliers in analytical results of soil Ah horizon samples for mineral exploration.

9. STABILITY AND STORAGE INSTRUCTIONS

UpDeep_ORG_Ah1 SRM should be stored in a room temperature unopened in their own plastic containers. Stability of the materials are not tested.

10. INSTRUCTIONS FOR CORRECT USE

UpDeep_ORG_Ah1 SRM is a dry sample, but needs to be sieved to a requisite size prior to analysis. It should be only used with samples of same matrix and concentration ranges.

11. HANDLING INSTRUCTIONS

Keep dry and do not touch with bare hands to avoid SRM contamination.

12. TRACEABILITY

The analyzed SRM samples represent the entire batch of prepared SRM. All the analyzed samples have individual names and can be traced back into the original analytical results. The laboratories

were chosen on the basis the availability of the analytical services specific to soils and offered range of elements usable for mineral exploration. The laboratories have ISO/IEC 17025:2005 accreditation (ALS Minerals/ALS Global), Quality ISO9001:2008, Environmental Management: ISO14001, Safety Management OH SAS 18001 and AS4801 certificates (Bureau Veritas Minerals Acmelabs).

13. LEGAL NOTICE

Geological Survey of Finland and Scandinavian Geopool have prepared and Geological Survey of Finland and Vienna Technical University have statistically evaluated the property values of this reference material to the best of their ability. Geological Survey of Finland, Scandinavian Geopool and Vienna Technical University assume no liability for any errors in this material and information. Geological Survey of Finland, Scandinavian Geopool and Vienna Technical University shall be free from, and indemnified by the user against, any liability for any damage or loss, whether direct or consequential, arising from or as a result of the use of this material and information.
